Zyplex DIGITAL

CLOUD & DEVOPS SERVICES

24x7 managed IT support

Securely empowering your digital growth

Your all-in-one IT partner: 24x7 support, DevOps, modernisation, cost optimisation, security and compliance.

Company profile · zyplexdigital.com · @zyplexdigital

WHO WE ARE

Your all-in-one IT partner. Everything in IT, except running your business.

24x7 support comes first. On top of it: DevOps, modernisation, cost optimisation, security and compliance, all from one team.

24/7
Support & monitoring

Happy clients

WHAT WE DO

All in one, from one team

24x7 Managed Support

NOC monitoring, server and desktop support, Microsoft 365 and L1–L3 engineers.

DevOps

CI/CD, infrastructure as code, Docker and Kubernetes on AWS, Azure and GCP.

App Modernisation

Legacy apps to containers, microservices and serverless, without a risky rewrite.

Cost Optimisation

Cloud cost reviews, right-sizing and waste clean-up.

Security

Server hardening, vulnerability management, WAF and zero-trust access.

Compliance

Audit-ready controls for ISO 27001, SOC 2, GDPR and PCI DSS.

CLOUD & DEVOPS

Faster, safer releases on any cloud

We build and run your platform on AWS, Azure and GCP, with automation baked in from day one.

- CI/CD pipelines and release automation
- Infrastructure as code with Terraform
- Docker and Kubernetes platforms
- Legacy apps re-platformed to containers, microservices and serverless
- Right-sizing and cloud waste clean-up

20–30%

More cloud than they use: what most businesses pay for. Our cost reviews find it and remove it.

SECURITY & COMPLIANCE

We close the gaps before attackers find them

Security

Server hardening, vulnerability management, web application firewalls and zero-trust access, set up and watched around the clock.

Compliance

Audit-ready controls and evidence, mapped to the systems we already run for you.

ISO 27001 SOC 2 GDPR PCI DSS

WHY ZYPLEX

A partner, not just a vendor

You focus on your customers. We take care of everything else in IT. No jargon, no lock-in, just dependable technology and honest advice.

- 24x7 support with certified L1–L3 engineers
- Security-first, from day one
- Transparent pricing and clear timelines
- You own your code and your data

15+ yrs
Combined experience

HOW WE WORK

A clear path from idea to impact

No surprises: a proven, transparent process from first call to long-term support.

01

Discover

We learn your business, goals and constraints before writing a line of code.

02

Design

Architecture, security and roadmap, reviewed and agreed with you.

03

Build

Iterative delivery with demos, so you see progress every step.

04

Support

Launch, monitor and improve. We stay on to keep things running.

CLIENT STORIES

Results our clients feel

“Zyplex migrated us to the cloud with zero downtime and cut our hosting bill by 40%. True professionals.”

Operations Lead
FinTech startup

“Their security review found issues three other firms missed. We sleep a lot better now.”

CTO
Healthcare SaaS

“Responsive, honest and genuinely skilled. They feel like part of our own team.”

Founder
E-commerce brand

LEARN WITH US

DevOps training & internships

Beyond building your systems, we build people. Hands-on courses and internships in CI/CD, Docker, Kubernetes, AWS, Terraform and DevSecOps, taught by engineers who ship in production every day.

500+
Learners trained

6
DevOps tracks
